

Recommended Emergency Apps

from the HLSK leader training committee

Recommended Emergency Apps

112

- 112 is the european emergency number for all EU-countries
- That means that you can call 112 and get help independent of where in Europe you are

Recommended Emergency Apps

SOS Alarm app

- SOS Alarm is the official app for the Swedish emergency number 112
- SOS Alarm is the central point for all emergency resources, such as ambulance, police, fire brigade and rescue services including mountain and sea rescue.
- Your actual position will be sent automatically
 - No worries about coordinate systems
- The SOS-operators talk swedish and english.
- The SOS 112 app should also work outside of Sweden as it automatically connects to the emergency center of the country where you are.

Recommended Emergency Apps

Reach 112 from remote locations

- Sometimes it can be difficult to find the exact position when a person calls the emergency number 112 from a mobile phone.
 - due to that the person in need is in an area with poor coverage
 - the forest road to the summer house is not marked on the map
- The 112 emergency number can also be contacted by SMS112 service

Satellite phone

- For those who are far out in the mountains, in the middle of the forest or, for example, out at sea, a satellite phone may be needed to get in touch with SOS Alarm in an emergency.
- The emergency number to reach SOS Alarm via satellite phone is: +46 63 107 112.

Recommended Emergency Apps

Hjelp 113 app

- With this app you have all emergency numbers in Norway in one place
 - 110 – Fire brigade
 - 113 – Ambulance
 - 112 – Police (and also for coordinating more complicated help?)

Recommended Emergency Apps

Collision with a larger wild animal

- Use also the SOS Alarm app
- You must mark the location and report it.
- This applies to: moose, roe deer, wild boar, bear, fallow deer, lynx, reindeer, red deer, otter, wolf, eagle, wolverine or mouflon sheep.
- In the event of accidents with other smaller animals, you do not need to report it.
